

ZETAWASH HPS

SOAPING AGENT / WASHING AGENT

Product Description:

Zetawash HPS is an acrylate-based formulation enhanced with a combination of surfactants and alcohols, meticulously designed to optimize detergency. This formulation serves as a potent low-foaming soaping agent, specifically tailored for use with reactive dyes and dyed and printed textiles made from cellulosic fibres and their blends.

With its robust cleaning capabilities and minimal foam production, it effectively removes residual dye and impurities without compromising fabric integrity. Ideal for achieving immaculate results in the post-dyeing and printing processes, Zetawash HPS ensures thorough cleansing of textiles while maintaining their vibrant colours and soft textures.

Key Benefits:

- 1. Superior Detergency:** Offers robust cleaning performance, ensuring high wash properties for dyed and printed goods, effectively removing stains and impurities.
- 2. Excellent Dispersing Properties:** Facilitates the dispersion of hydrolyzed and unfixed reactive dyes in the bath, preventing redeposition on fabric surfaces and enhancing wet fastness properties.
- 3. Effective Complexing:** Exhibits complexing properties, enabling optimal performance even in hard water conditions, while effectively removing salt deposition on fabric surfaces.
- 4. Low Foaming Nature:** Formulated with a low foaming nature, minimizing foam production during washing processes, ensuring efficient cleaning without excessive foam buildup.
- 5. Environmental Compatibility:** Boasts good biodegradability, aligning with environmental sustainability goals, ensuring minimal ecological impact during use and disposal.

Properties:

Chemical Constitution	Sodium salts of modified polyacrylates
Ionic Character	Anionic
pH of 5% Solution	Approx. 7 – 8
Specific Gravity at 20°C	Approx. 1.2 gm/cc
Physical Form	Liquid
Storage Stability	Stable for 1 year at 20°C
Compatibility	Can be used together with non-ionic and anionic chemicals

Applications & Dosage:

Soaping / After-Wash — Reactive Dyed & Printed Cellulosic Fabrics

Function	Product	Dosage	Parameters & Conditions
Soaping Agent	ZETAWASH HPS	0.3% – 1.0%	Depending upon shade depth, best efficiency at 95°C for 12–15 minutes

Generally single bath soaping at 80°C for light shades, single bath soaping at 95°C for medium shades, and double bath soaping at 95°C for Turquoise and dark shades are recommended.
